

BSL ENABLING Sharon Brown -Testimonial

I was delighted to hear Sharon has taken steps to setting up a specialist enabling service for hearing impaired and individuals with communication difficulties as it has often been the case that assumed 'lack of communication' particularly within the deaf community people can become socially isolated.

Sharon has a diverse working background of working competently with clients with a range of disabilities including, Autism and learning disabilities; physical disabilities and sensory impairment, visual and hearing. Sharon has an innovative approach to person-centred planning and enabling work – Her starting point being to look at a person's wishes with them and support them to overcome obstacles and achieve their goal.

I have made several referrals to BSL Enabling all of whom have had the benefits of a highly professional provider who motivates her clients to recognise what they can do and they have gone on to achieve more than they had expected for themselves.

It is my experience of working with Sharon that she derives a great deal of personal and professional satisfaction helping people to gain levels of control in their lives which without her support may not have been perceived to be possible by the person or in some cases their family and friends.

I wish Sharon continued success with BSL Enabling and have no hesitation in supporting her for this award.
