

*Sharon has worked as an enabler with my client who has a learning disability, a speech impediment and is very strong minded. My client also finds it difficult to cope with change. However, since Sharon has been working with her, she now has her hair washed and cut on a regular basis, goes swimming, takes her clothes to the laundrette for washing, will go shopping for new clothes and has the confidence to go away on trips with an organised group, none of which she would have done before without the help and support of Sharon. Due to my client's mobility decreasing, it has been necessary for her to move to a home on a single floor. Sharon has been instrumental in finding an appropriate home for her as well as organising the move, helping get new furniture, and making sure my client felt safe and secure in her new home. I can say that without Sharon's assistance and support, my client would not have been able to cope with the move, but is now happy and settled in her new home. On a number of occasions Sharon has gone above and beyond what is expected, which is greatly appreciated.*
